**Amendments to the Claims:**

This listing of claims will replace all prior versions and listings of claims in the application:

**Listing of Claims:**

- 1 (currently amended): A portable storage device connecting to a master computer and a  
5 first slave computer through a serial bus interface, the portable storage device  
comprising:  
a non-volatile memory for storing data in the portable storage device;  
a first slave port for connecting the portable storage device to the first slave  
computer through the serial bus interface; and  
10 a master port for connecting the portable storage device to the master computer  
through the serial bus interface;  
wherein the master computer is capable of directly accessing data located on the  
portable storage device and storage apparatuses of the first slave computer and  
the first slave computer is not capable of accessing any data located on the  
15 portable storage device and the master computer.
- 2 (currently amended): The portable storage device of claim 1 further comprising a  
second slave port for connecting the portable storage device to a second slave  
computer through the serial bus interface, wherein the master computer is capable of  
20 directly accessing data located on the second slave computer and the second slave  
computer is not capable of accessing any data located on the portable storage device,  
the first slave computer, and the master computer.
- 3 (currently amended): The portable storage device of claim 1 further comprising an  
25 expansion port for connecting an external storage apparatus to the portable storage  
device, wherein the master computer is capable of directly accessing data located on  
the external storage apparatus and the first slave computer is not capable of

accessing any data located on the external storage apparatus.

4 (original): The portable storage device of claim 1 wherein the serial bus interface is a universal serial bus (USB) interface.

5

5 (original): The portable storage device of claim 4 being compatible with the USB Mass Storage Class Bulk-Only Transport specification.

6 (original): The portable storage device of claim 4 being compatible with the USB  
10 On-The-Go specification.

7 (original): The portable storage device of claim 1 wherein the serial bus interface is an IEEE 1394 interface.

15 8 (original): The portable storage device of claim 1 wherein the non-volatile memory is a flash memory.

9 (currently amended): A method of connecting a portable storage device to a master computer and a first slave computer through a serial bus interface, the method  
20 comprising:  
providing a non-volatile memory in the portable storage device for storing data;  
connecting the portable storage device to the first slave computer using the serial bus interface; and  
connecting the portable storage device to the master computer through the serial bus  
25 interface, such that the master computer is capable of directly accessing data located on the portable storage device and storage apparatuses of the first slave computer and the first slave computer is not capable of accessing any data located on the portable storage device and the master computer.

- 10 (currently amended): The method of claim 9 further comprising connecting the portable storage device to a second slave computer through the serial bus interface, wherein the master computer is capable of directly accessing data located on the second slave computer and the second slave computer is not capable of accessing any data located on the portable storage device, the first slave computer, and the master computer.
- 11 (currently amended): The method of claim 9 further comprising connecting an external storage apparatus to the portable storage device, wherein the master computer is capable of directly accessing data located on the external storage apparatus and the first slave computer is not capable of accessing any data located on the external storage apparatus.
- 12 (original): The method of claim 9 wherein the serial bus interface is a universal serial bus (USB) interface.
- 13 (original): The method of claim 12 wherein the portable storage device is compatible with the USB Mass Storage Class Bulk-Only Transport specification.
- 14 (original): The method of claim 12 wherein the portable storage device is compatible with the USB On-The-Go specification.
- 15 (original): The method of claim 9 wherein the serial bus interface is an IEEE 1394 interface.
- 16 (original): The method of claim 9 wherein the non-volatile memory is a flash memory.

Appl. No. 10/065,903

Reply to Office action of April 08, 2005

17 (new): The portable storage device of claim 1 wherein the master computer is capable of directly accessing data located on any storage apparatuses of the first slave computer.

- 5 18 (new): The method of claim 9 wherein the master computer is capable of directly accessing data located on any storage apparatuses of the first slave computer.
